

Promoting Improved Health and Productivity

BeneCard PBF works with our DVHCC clients to increase the quality of patient care while decreasing the costs of their prescription benefit plan. With a full suite of advanced clinical programs, BeneCard PBF has saved our clients millions of dollars and has served patients with a personalized approach to managing their medical conditions.

BeneCard PBF’s suite of advanced clinical programs includes:

Clinical Program	Program Description
Specialty Pharmacy and Clinical Programs	BeneCard PBF’s Specialty Programs offer personalized service, patient intervention and consultation to improve adherence and quality of life.
Fraud, Waste & Abuse Program	The Fraud, Waste and Abuse Prevention program is designed to identify and prevent fraudulent and wasteful activity.
Clinical Cost Management Mailing Program	This program proactively educates members on available lower cost medication options.
Concurrent Drug Utilization Review	This process occurs when a prescription is presented by the member to their pharmacy and identifies potential concerns including non-compliance and refill too soon.
Retrospective Drug Utilization Review	After a prescription has been dispensed, this process identifies therapeutic and clinical issues using historical claims data to analyze patterns in utilization.
Medication Adherence Program	This program focuses on identifying suboptimal utilization patterns likely to result in adverse patient outcomes.
Medication Therapy Management Program	This program aims to improve the health of members while focusing on educating them about their medical condition.
Prior Authorization Program	This program allows a client to control plan costs while ensuring appropriate and safe utilization of medications by requiring select medications to undergo a review for medical necessity.
Step Therapy Program	This program designed to encourage the utilization of lower cost, generic medication alternatives for chronic medical conditions.
RxTrainer	This wellness management program is designed to provide relevant health information and support to participants while encouraging members to take an active role in the self-management of their health and wellness.

BeneCard PBF’s clinical programs are customized to meet our clients’ needs and goals. To learn more about how BeneCard PBF’s clinical solutions will help you achieve your goals, please visit www.benecardpbf.com.
