

PROMOTING IMPROVED HEALTH AND PRODUCTIVITY

BeneCard PBF works with our DVHCC clients to increase the quality of patient care while decreasing the cost of their prescription benefit plan. With a full suite of advanced clinical programs, we have saved clients millions of dollars and service patients with a personalized approach to their medical conditions.

BeneCard PBF's suite of advanced clinical programs includes:

Specialty Pharmacy and Clinical Programs	BeneCard PBF's Specialty Programs offer personalized service, patient consultation to improve adherence and quality of life.
Fraud, Waste & Abuse Program	Designed to identify and prevent fraudulent and wasteful activity.
Clinical Cost Management Mailing Program	Proactively educates members on available lower cost medication options.
Concurrent Drug Utilization Review	Occurs when a prescription is presented by the member to their pharmacy and identifies potential concerns including non-compliance and refill too soon.
Retrospective Drug Utilization Review	After a prescription has been dispensed, this process identifies therapeutic and clinical issues using historical claims data to analyze patterns in utilization.
Medication Adherence Program	Focuses on identifying suboptimal utilization patterns likely to result in adverse patient outcomes.
Medication Therapy Management Program	Aims to improve the health of members while focusing on educating them about their medical condition.
Prior Authorization Program	Allows a client to control plan costs while ensuring appropriate and safe utilization of medications by requiring select medications to undergo a review for medical necessity.
Step Therapy Program	Designed to encourage the utilization of lower cost, generic medication alternatives for chronic medical conditions.

BeneCard PBF's clinical programs are customized to meet our clients' needs and goals. For more about how BeneCard PBF's clinical solutions will help you achieve your goals, visit www.benecardpbf.com.
