

# Empowering Productivity & Clinical Innovation

BeneCard PBF partners with DVHCC to improve the quality of coalition member care while reducing pharmacy benefit costs. Our advanced clinical programs combine evidence-based oversight, personalized member support, and a transparent, client-first business model designed to deliver measurable results.

## BeneCard PBF's suite of advanced clinical programs includes:

### **BenePrecise® Pharmacogenetics**

BenePrecise® uses pharmacogenetic testing to identify how an individual's genetics may impact medication response, supporting safer, more effective, and more personalized treatment decisions.

### **Clinical Review**

Through comprehensive medication reviews, our Clinical Review Program helps identify risks, close care gaps, and support better clinical outcomes.

### **Drug Utilization Review (DUR)**

Our DUR Program provides proactive, pharmacist-driven reviews to ensure medications are used safely, appropriately, and in alignment with clinical best practices.

### **Fraud, Waste, & Abuse (FWA)**

With continuous surveillance and evidence-based review, our FWA Program mitigates fraud, waste, and abuse to ensure members receive care that is both appropriate and cost-responsible.

### **New to Market Drug Exclusions**

Through proactive monitoring and expert review, our New to Market Drug Exclusions Program evaluates new medications as they enter the market to safeguard member safety and manage cost impact.

### **Quantity Limits (QLL)**

Our Quantity Limits Program ensures medications are dispensed in clinically appropriate amounts, promoting safe use and reducing unnecessary waste.

### **Responsible Rx**

With expert evaluation of high-risk medications, the ResponsibleRx Program supports safer prescribing practices and more effective therapy management.

### **Starter Dose**

Starter Dose encourages safe therapy initiation by guiding members toward lower, clinically appropriate starting doses to reduce side effects and improve tolerability.

### **Step Therapy**

Our Step Therapy Program promotes safe, cost-effective care by guiding members to try clinically proven first-line medications before moving to higher-risk or higher-cost alternatives.

BeneCard PBF's clinical programs are customized to meet our clients' needs and goals. For more about how BeneCard PBF's clinical solutions will help you achieve your goals, visit [benecardpbf.com](https://benecardpbf.com).
